

Library Mission

Why are school libraries important?

School libraries provide an opportunity for children to experience the enjoyment reading and the excitement of discovering knowledge. School libraries provide access to the knowledge of the world, as well as teach lifelong learning, literacy, and technology skills that have become the priority of our society. School libraries give children an opportunity to explore both print and electronic media.

What are the library goals?

It is our goal to equip children with lifelong learning and literacy skills enabling them to participate and contribute to the community. We strive to help every child be familiar and comfortable in the library and learn the skills to find their way around libraries in general.

What is the role of the school Library Staff?

The Library Assistants have the best job in the school! We get to play a unique and supporting role in our student's reading and learning processes at school. We help children find books and resources to support their reading interests and class work. We also teach children and families how to use the library and information technology. These are skills we use our whole lives. At Butler, we also believe it's important to be an integral part of our school community and connect with families and teachers. We support families' reading efforts at home and strive to be a strong resource and support to our schoolteachers.

Butler Library Assistants: Mrs. Tyler and Mrs. Fisher
